

Salt Delivery

Soft Water, Inc. is a full-service water treatment dealer that also offers residential salt delivery. If you are like many of our customers, carrying salt into the basement is one of your least favorite household activities. By using our salt delivery service, you can take the strain off of your back and also off of your mind.

Our friendly personnel will deliver the salt to your basement and pour it into the salt tank for you. Soft Water, Inc. has an auto refill service which will notify us to call and schedule your salt delivery when you are running low, before you run out. You will never have to worry about carrying another bag of salt again.
